About Me:

I'm a Games Design graduate with a 2:1 degree and a First-Class dissertation who enjoys bringing ideas to life through game development. Through both solo and collaborative projects in Unreal Engine, Unity and Gamemaker studio 2, I've developed a passion for creating engaging player experiences and continuously improving my work through testing and iteration. I'm excited to begin my career in the games industry and continue developing my skills as part of a professional team.

I'm currently seeking graduate and junior opportunities in gameplay programming, level design and technical design. If you'd like to discuss my projects or have any questions, feel free to get in touch.

Technical Skills	Key Projects
Game Development - Unreal Engine 5 - Unity - Blueprint visual scripting - Gameplay Design - Feature Ideation Quality Assurance - Gameplay Testing - Bug Reproduction - Playtesting Software - Git & Github - Blender - Photoshop	Final Year First Class Dissertation Project (UE5) Solo/ Final Year Project - Designed and developed a cooperative horror game in Unreal Engine 5 - Conducted structured playtesting and user evaluation - Iterated gameplay based on player feedback - Documented development through 100+ progress videos, supporting issue tracking and feature iteration. - Awarded a First-Class grade Third Person Adventure Game (UE5) Shadows of Stratosia Team of 10 Bournemouth University - Collaborated within a multidisciplinary team to develop a third-person adventure game in Unreal Engine 5. - Designed and built gameplay environments with a focus on player flow and exploration. - Created textures and environmental assets to support the games visual style. - Developed lore and environmental storytelling to strengthen narrative immersion. - Worked closely with teammates using regular feedback and iteration through development
Education	
BSc (Hons) Games Design (2:1)	

Bournemouth University
2022-2026

- Graduated with a 2:1
- Awarded a First-Class Dissertation

Level 3 Game Development Projects

Fareham College | 2020–2022

- Awarded a Distinction in Level 3 Game Development

Creekwood Sanatorium (UE4)

Solo Project

- Independently designed and developed a stylized short horror game in Unreal Engine 4.
- Created gameplay mechanics, level layouts and environmental interactions.
- Designed horror environments to build atmosphere and player tension.
- Managed the full development process from concept through to completion.

Project EHM (Gamemaker Studio 2)

Team of Two

- Tasked with making a spin off from an existing game franchise.
- Designed gameplay systems and core mechanics for a collaborative game project
- Programmed gameplay mechanics using Gamemaker studio.
- Assisted with visual implementation and gameplay balancing
- Collaborated closely with another developer to deliver the project on schedule.

Additional Projects: include Unity voice-controlled RNLI Dispatch simulator, UE4 multiplayer party game, solo Gamemaker platformer and various university animation projects.
